Education

Drexel University Philadelphia, PA
Bachelor of Science in Computer Science - GPA 3.86 *Sep. 2019 – June 2024*

Experience

Susquehanna International Group Sep. 2024 – Present
Software Developer - Corporate Systems *Philadelphia, PA*

- Built and deployed a firm-wide code review agent, reviewing 1000+ merge requests per week for 30+ teams resulting in more reliable and bug-free code
- Shipped a firm-wide web application for generating and deploying MCP servers to Kubernetes based on an existing API specification, allowing several existing internal systems to be integrated with AI agents without writing any code
- Collaborated with a team of three to design and deploy an AI-powered C# platform that enables Corporate Researchers to identify stocks of interest from real-time news, reducing research time from days to minutes and supporting more informed investment decisions
- Developed a platform to automate tagging Azure resources with mandatory metadata using C# across all Azure subscriptions at the firm, allowing for easier management and compliance

Susquehanna International Group March 2023 – Sep. 2023
Software Engineering Coop - Corporate Systems *Philadelphia, PA*

- Worked on multiple projects leveraging the .NET ecosystem, SQL Server databases, and Elastic APM
- Automated IIS log retrieval and database updates using C#, facilitating data visualization on a Grafana dashboard for informed decision-making
- Built a .NET 7 Minimal API application to automate our teams software testing workflows and deployed it to Kubernetes, pioneering solutions for Windows Authentication challenges inside Linux containers

SAP America March 2021 – March 2023
Software Engineering Coop - Artificial Intelligence *Philadelphia, PA*

- Contributed to an open-source ML platform (ML Lab **github.com/SAP/machine-learning-lab**) that acts as a centralized hub for development teams to seamlessly develop, build, deploy, & operate ML solutions at scale
- Seamlessly integrated an open-source solution, ML Flow, into ML Lab for tracking parameters, metrics & artifacts for each run using Python, FastAPI & React
- Developed a Job Scheduler component that runs user specified jobs on a repeated schedule by parsing a cron string

Software Engineering Coop - Production Management Portals

- Developed a webapp with a vanilla JavaScript front-end and Node.js backend, along with a Terraform Provider written in Go, to report virtual machine usage to SAP's internal auditing system
- Enhanced app reliability and scalability by deploying it via Docker and Kubernetes
- Created a private Terraform registry for simplified Provider installation and wrote Terraform modules to improve employee productivity

Projects

Drexel Scheduler | scheduler.zohair.dev | GitHub Feb 2023 – Present

- Developed a Python web scraper to autonomously fetch Drexel's course catalog and professor ratings from RateMyProfessors; data stored in a PostgreSQL database
- Created a Grafana dashboard with a user-friendly interface, allowing students to efficiently find electives by filtering and sorting instructor ratings and course data achieving over 2000 active users as measured by Google Analytics
- Hosted application on a Kubernetes cluster using Oracle Cloud, ensuring high availability and scalability
- Automated the CI/CD pipeline with GitHub Actions, reducing deployment time by 50%

Technical Skills

Languages: Python, C#, JavaScript, SQL
Tools & Frameworks: .NET, Express.js, FastAPI, React, Docker, Kubernetes, Helm, Terraform, GitLab CI/CD, Git
